Release Note

Sprint 6 Subhanga's Pain(t) Version 1.0.0 - 09/10/2021 Logging with (based on) threading is required

- Select-Copy-paste (versus select-move-and-paste)
- Indication of which tool is in use
- Button to turn on/off autosave
- Javadoc-style comments implemented

Sprint 5 Subhanga's Pain(t) Version 1.0.0 - 09/10/2021

- Have an Undo/Redo using an abstract data type
- Blank/starter image
- Have an eraser tool
- Be able to draw a "regular" (same side length) polygon with the user specifying the # of sides.
- Live draw / interactive draw (you should "see" the line or shape as you draw it)
- Select a piece of the image and move it.

Sprint 4 Subhanga's Pain(t) Version 1.0.0 - 09/10/2021 New features:

- A pencil tool
- Width and color selection should work for both pencil and line tools.
- Draw a square, a rectangle, an ellipse, and a circle, with fill * "Smart" save ("you've made changes...")
- Open multiple image file types
- Keyboard UI controls
- A text label describing the color.
- Color "grabber"/dropper tool.
- Resize canvas (and resulting image) and zoom in/out.

Sprint 3 Subhanga's Pain(t) Version 1.0.0 - 09/10/2021 New features:

- Save an image to a file
- Allow for "save as"
- Draw a line
- The canvas that resizes to fit the image being opened
- Scroll bars
- Width of the line drawn
- A color chooser

Sprint 2 Subhanga's Pain(t) Version 1.0.0 - 09/10/2021 New features: save an image to a file

- Allow for "save as"
- Draw a line (which would become part of the save image)

- Have a working space (canvas or whatever!) that resizes to fit the image being opened -- no unintentional cropping!
- Has scroll bars
- Allow you to control the width of the line drawn
- Have a color chooser
- Have a help menu item with help and about options

Expected next sprint:
  - multiple tabs,
  - cleaner graphics,
  - more class and method

Sprint 1 Subhanga's Pain(t) Version 1.0.0 - 09/10/2021 New Features:
- Allow the user to view an image from a file(multiple file type)
- Allow the user to specify/choose the file to open
- Menu bar
- Closes politely

Known issues:
- More class and method
